ZB-09 AUTOMATIC PAPER CUP MAKING MACHINE

1. Main technical parameter:

General power	5.5kw
Paper request	150-350g/m ² (single PE)
Voltage supply	220v50hz/380v50hz or

	customized
Cup size	1.5-9oz
Speed	45-55pcs/min
Weight	1300kgs
Measurement	2300*1150*1600mm
Paper cup top diameter	Min35mm-max82mm
Paper cup bottom diameter	Min30mm-max52.8mm
Paper cup height	Min30mm-max92mm
Price (FOBningbo)	6500 USD

2.Main Equipment List:

Picture	Description	Brand/material
	inverter	sangchuan
	Gear box	100#
	Main motor	China jingguang

	knurling motor	China jingguang
	cylinder	6.0*125,yishida
	reducer	China anjie
	3 round heater 、3 圈加热圈	Good quality material we can find in market
	Temperature controller	YATAI
	relay	CHNT
	counter	YATAI

	Knurling bearing 5204	It is imported
	contractor	CHNT
	liner bearing	Good quality material we can find in market
	bottom die set 、冲底刀一套	R12
	heating furnace 、加热炉	45# steel
	flat mould head /扁摸头	45#steel
	unilateral bearing、单向轴承	Good quality material we can find in market

	bearing φ25xφ32x20	Good quality material we can find in market
	knuckle bearing、关节轴承	Good quality material we can find in market
	composite bushing、复合套	Good quality material we can find in market
	shaft holder、铝 型直线轴承座	Good quality material we can find in market
	knurling set 、 滚底模座一套	45#steel
	curling set 卷边 模座一套	45# steel

3.our advantage:

A.our knurling bearing is imported,better quality than other

factory.

B.Our Temperature controller is real thing,other factory all use fake one.

C.We all know that,gear box is important to paper cup machine,so our gear box use good quality one,expensive than other factory.

D.our machine is flat,but we use machine hand,can help the paper cups drop smoothly and accurate,better than incline design.

E.As other factory say their heating mold is flat,good for heating,but in fact,it is up to cup angle size,if the cup angle large,then use flat heating mold,if the cup angle size small,then need use round heating mold

F.Our chain wheel,bearing,big cam all been processed,and other factory all not do like this,so our facotry these spare parts more stronger and make sure you use long time.

G.Our big cam use 40R material is better than other factory

H.Our mold made by 45# steel,it is hard to broken,

I.Our 09 model machine is special for small paper cups,like 3oz,4oz,7oz,9oz paper cups,and no factory can like us can let the machine speed reach 50pcs/min.

J.Our 09model machine general power is 5.5kw,can help you save electric cost,as in some country,the electric cost is expensive,

K.And one 20"container can hold 5 sets 09 model paper cup machines,can help you save shipping cost.

L.Our 09model paper cup machine use 100#gear box,do not influence the machine lifetime and quality,as for examples,if one 250ml paper cups,just can hold 250ml water,if you put 300ml water on 250ml paper cups,then it is waste,it is the same as this machine.

M.And in china,do not many factory have this machine,one year ago,just my factory has this machine,and we have sold this machine for more than 10 years,has much experience,but this year,some factory copy our this model

machine, but you can see the quality is very different, and some machine design is not good as us, they also use bad quality material to save their machine cost.

4. Warranty

1. warranty: 1 year
2. the guide booklet will be sent with machine to guide the installation process works, adjust the whole machine, production, avoid or solve the problem which the buyer will face.
3. we will adjust the machine well for one week before the delivery, ensure the machine has the perfect performance.
4. we can dispatch technologists to buyer's factory, guiding installation, adjustment for a period, the buyer in charge of the salary, traffic fee, boarding and lodging, communication and each day 100usd living allowances.
5. we supply the free training of buyer, the training won't stop until the buyer control the whole lesson! the cost of air ticket, boarding and lodging should be provided by buyer.
6. we supply the consumable spare parts for free for one year use.
