

# Shanghai PanDeng Power Supply Co.,Ltd

NO.	Model		The multi-view of product		Tape	Features	Accuracy	Application	Advantages
			Front	Inside					
1	DBW • SBW 5	Automatic voltage stabilizer			Update product Single phase series Three phase series	Carbon brush mechanical work Respond time is long ( $\geq 2s$ ) Need to pay attention to the environment Regular cleaning and maintenance Adjust generate sparks easily	1%~5% adjustable	Suitable for ordinary users	The price of small power is lower
2	DBW • SBW 5B	Electronic voltage stabilizer			Patent product Single phase series Three phase series	No mechanical part No carbon brush No noise The quickest respond time ( $\leq 100ms$ ) Voltage regulating range is wide Using special surge protector Don't need to maintain for a long time	2%~3%	Communication Radio broadcasting field Traffic National defense industry construction Construction Medical industry Production line Construction engine Precision machine Elevator etc.	The quickest respond time Voltage regulating range is wide Lightning surge protection Don't need to maintain for a long time Voltage instability applied to any place, to ensure the normal operation of your electrical equipment.
3	SGW5C	Voltage stabilizer			Patent product Three phase series	Continuous linear voltage adjustment Durable and long in service life Strong overloading capacity Easy maintenance Small volume light weight Wide input power range Special lightning surge protection Respond time is short ( $\leq 200ms$ )	1%~5% adjustable	Automatic punching machine Automatic bending machine Mould engraving machine Medical equipment Chemical engineering equipment CNC processing machine SMT automatic plug-in unit machine Precision circuit etching machine Metal laser cutting machine PCB automatic drilling machine Precision wire cutting machine Electrospark mirror machine Exposure machine Light painting machine Precise color printing equipment	Durable and long in service life Wide input power range Respond time is short Lightning surge protection Voltage instability applied to any place, to ensure the normal operation of your electrical equipment.

## Notes:

1. According to the voltage grade of customer's countries demand for voltage stabilizer.

2. All specifications are according to the compensation of the specifications of the 20%, the different compensation scope and different voltage grade will change accordingly.
