

# MULTI-FUNCTIONAL BREAD MAKING MACHINE

## I Technical parameters

Model	HYM-II
Product weight	15-180g/pc (customizable)
Capacity	60-150pcs/min
Voltage	220V/380V(customizable)
Power	3.5kw
Control system	PLC
Operation	Touch screen
Machine Dimension	4800*720*1560mm
Machine weight	800kg
Warranty	1 year
Certification	ISO9001:2008, CQC, CE

## II Feature

1. Bread making machine to complete continuous tableting , dough finishing, winding, making patterns, quantitative cutting, add stuffing, forming automatic wobble and a series of bread, hamburger production. Realized the whole process of large-scale production of bread and hamburger.
2. Use a number of advanced technologies collection photo electric induction 、 electromagnetic induction 、 HMI 、 PLC 、 new material 、 bionic technology and so on, High degree of automation.
3. All materials in contact with the flour are stainless steel, polypropylene, PU, latex, nylon 1010, etc. that meet food-grade safety requirements. The equipment is externally sealed with stainless steel and polycarbonate plates. To meet the needs of large-scale industrial production.

## III Product Range

Used for brushed bread, hamburger, French soft bread, etc.

#### IV Price

Port: customer designated port

Payment term: 30% deposit by T/T, the balance by T/T after inspection before shipment.

Delivery time: 20 days after receiving deposit

Unit price: USD 13400 FOB SHANGHAI

#### V Guarantee and after-sale service

We offer free training here in China. Also we can send technicians oversea for whole

line installation and training. The relevant cost including Visa, insurance, round flight ticket, labor cost and accommodation should be borne by buyer

The guarantee period is one year since the date B/L. During this period, we will offer free parts for changing if machine quality problem. Also the spare parts can be offered in original cost after that. The freight for part sending will be paid by buyer.
