## **SUGAR EFFECT FINISHING** ON FLAT SURFACE

**Striking the perfect balance between a textured and lustre finish, sugar effect finishing technique is a testament to that. Its dual-depth and honed surface glimmers in shine with patches of dazzling tiny speckles of reflective glazed surface - resulting in a gentler and softer finish across the slate.**

Soft bristle brush strokes caressing various mediums revealing diversenarratives through the masterful play of brushwork - thick or smooth, long or short, broken or solid, linear or organic - all now consolidated and immortalized in the form of a series of tile-work; all up to speed and ready to paint new narratives in new dwellings.

Each different tiles series is produced to meet different performance requirements. For specific product technical performance, please request from **KITO** sales team or their agent or distributor.

Colour Variations: Since the colour reproduction in this printed piece will vary from the actual tile colours, final selection should be made from tile samples. Colour, shade and glaze variations may exist due to the inherent characteristics of porcelain tile.
